Notice No. 7
Stay Vigilant against the Spread of Communicable Diseases in Schools

According to the Centre for Health Protection (CHP), outbreaks of communicable disease such as chickenpox, dengue fever, hand, foot, mouth disease (HFMD) and influenza may occur in institutions and schools from time to time, it is important to take necessary precautions.

Parents should measure children's temperature before they leave home for school everyday, and seek medical advice as soon as possible if your children develop symptoms of diarrhea, vomiting and skin rash. If symptoms such as fever, sore throat, cough or influenza are developed, they should put on a mask immediately and seek medical care promptly. Please let the children stay at home for rest until symptoms have improved and fever has subsided for at least two days, or follow the medical advice on sick leave, whichever is longer.

Meanwhile, parents should inform the School immediately if children are sick or have been admitted to hospital for surveillance. Such information and contact details of students would be reported to CHP or relevant government departments on a need basis to help the School effective control measures to prevent the spread of communicable diseases.

通告第七號
預防傳染病在校內傳播

據衛生防護中心表示，一些傳染病例如水痘、登革熱、手足口病及流感等不時於院舍及學校爆發，謹請家長為子女採取各項防禦措施。

每天上學前，家長請為子女量度體溫；如有腹瀉、嘔吐及皮疹病徵，應盡快求醫；如有發熱、喉嚨痛、咳嗽或各類流感病徵狀，必須立即戴上口罩和盡早求診，且須留家休息，按照醫生的病假指示或直至徵狀消失及退燒後至少兩天(以較長者為準)才可回校。

此外，如子女不適或須留院觀察，需立即通知學校。學校在有需要時會向衛生防護中心或有關部門呈報學生的情況及聯絡資料，使防控傳染病的工作可更有效地進行。
